

Country Profile:

Republic of Côte d'Ivoire

République de Côte d'Ivoire

Côte d'Ivoire at a Glance

Capital:	Yamoussoukro
Official language:	French
Population:	(2009 estimate) 20,617, 068
Government:	Presidential Republic
Independence from France:	7 August 1960
National or Regional Currency:	West African CFA franc (XOF)
Area:	Total: 322,463 sq km Land: 318,003 sq km Water: 4,460 sq km

Location: Western Africa, bordering the North Atlantic Ocean, between Ghana and Liberia

Geographic coordinates: 8 00 N, 5 00 W

Map references: Africa

Area: total: 322,463 sq km land: 318,003 sq km water: 4,460 sq km

Terrain: mostly flat to undulating plains; mountains in northwest

Land boundaries: total: 3,110 km border countries: Burkina Faso 584 km, Ghana 668 km, Guinea 610 km, Liberia 716 km, Mali 532 km

Coastline: 515 km

Maritime claims: territorial sea: 12 nm exclusive economic zone: 200 nm continental shelf: 200 nm

Geography - note: most of the inhabitants live along the sandy coastal region; apart from the capital area, the forested interior is sparsely populated¹

History

Our knowledge of the early history of the region now known as Côte d'Ivoire is limited. There is some evidence of Neolithic activity, but much still needs to be done in investigating this. Oral histories give rough indications of when various peoples first arrived, such as the Mandinka (Dyula) people migrating from the Niger basin to the coast during the 1300s. In the early 1600s Portuguese explorers were the first Europeans to reach the coast; they initiated trade in gold, ivory and pepper. The first French contact came in 1637 -- along with the first missionaries.

In the 1750s the region was invaded by Akan peoples fleeing the Asante Empire (now Ghana). They established the Baoulé kingdom around the town of Sakasso.

A French Colony

French trading posts were established from 1830 onwards, along with a protectorate negotiated by the French Admiral Bouët-Willaumez. By the end of the 1800s borders for the French colony of Côte d'Ivoire had been agreed with Liberia and the Gold Coast (Ghana).

In 1904 Côte d'Ivoire became part of the Federation of French West Africa (Afrique Occidentale Française) and run as an overseas territory by the Third Republic. The region transferred from Vichy to Free French control in 1943, under the command of Charles de Gaulle. Around the same time the first indigenous political group was formed: Félix Houphouët-Boigny's Syndicat Agricole Africain (SAA, African Agricultural Syndicate), which represented African farmers and landowners.

Independence

With independence in sight, Houphouët-Boigny formed the Parti Démocratique de la Côte d'Ivoire (PDCI, Democratic Party of Côte d'Ivoire) -- Côte d'Ivoire's first political party. On 7 August 1960, Côte d'Ivoire gained independence and Houphouët-Boigny became its first president.

Overview of Economy

Côte d'Ivoire Economic Outlook

- Thanks to a return to political, social and institutional normality and efforts to rebuild and rehabilitate basic infrastructure, economic activity picked up, with growth estimated at 8.6% in 2012, expected to reach 8.9% in 2013 and 9.8% in 2014.

- If these growth rates are to be achieved the process of national reconciliation and social cohesion will need to be strengthened, and reforms to improve the business climate accelerated so the private sector can act as a driver of the revival of the economy.
- The country needs to take full advantage of its natural resources to maintain this momentum both by increasing the share of its agricultural products that are processed and by strengthening its institutional and human capabilities and making more transparent the management of its fossil-fuel and mineral resources.

Economic activity after the post-election crisis was more vigorous than expected. The return of confidence among economic actors in the aftermath of the normalisation of the security situation and increased peace efforts was accordingly confirmed. After a fall of 4.7% in 2011 real gross domestic product (GDP) registered growth estimated at 8.6% in 2012, driven by public investment and the pick-up in final consumption. In the medium term the implementation of the National Development Plan (PND) 2012-15 should put the country back on the trajectory of inclusive and sustainable growth. GDP is forecast to grow in 2013 and 2014 at 8.9% and 9.8% respectively, sustained by the recovery of oil and gas production and by a rise in investment prompted by a better business climate and a strengthening of public-private partnerships.

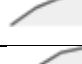

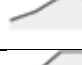

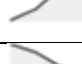

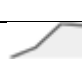

As a result of efforts to revive the economy the overall budget deficit deepened in 2012. For the first time in five years the external current account recorded a deficit. Nevertheless the satisfactory execution of the 2011-14 economic and financial programme, backed by the Extended Credit Facility (ECF) of the International Monetary Fund (IMF), enabled the country to reach the completion point of the Highly Indebted Poor Countries (HIPC) Initiative in June 2012 and to benefit from a substantial cut in its external debt. Inflation also returned to below the 3% level set at community level. On the political front the country saw notable progress in institutional, social and political, security and human rights normalisation. To fortify the recovery and ensure sustainable growth, Côte d'Ivoire needs to continue its efforts in terms of structural transformation by taking full advantage of its considerable natural resources. In this respect, several obstacles hampering the sustainable management of natural resources need to be overcome. These are the weakness of the links between the companies exploiting the resources and the other sectors of the economy, and inadequate transparency in natural resources management and contracts relating to the sharing of production between the government and the oil companies.

The country also enjoys a strong agricultural potential as the world's biggest producer of cocoa. An increase in the rate of processing of agricultural production, which varies between 2% and 27%, should be a priority objective for the authorities in the years ahead.⁴

GDP⁵

GDP Annual Growth Rate⁶

The Gross Domestic Product (GDP) in Ivory Coast expanded 9.80 percent in 2012 from the previous year. GDP Annual Growth Rate in Ivory Coast is reported by the Central Bank of West African States. Ivory Coast GDP Annual Growth Rate averaged 3.68 Percent from 1961 until 2012, reaching an all time high of 17.61 Percent in December of 1964 and a record low of -10.96 Percent in December of 1980. Côte d'Ivoire is the largest economy in the West African Economic and Monetary Union. After years of political instability and economic decline the country has been steady growing. Agriculture has been the backbone of the economy. Cote d'Ivoire is the largest cocoa producer in the world (30 percent of the world's production), big exporter of coffee and palm oil. The country also has significant offshore oil and natural gas reserves, which exploration has already boosted government revenues. Moreover, government increasing investment in education and infrastructure resulted in the development of manufacturing industry.

GDP per Capita⁷

The Gross Domestic Product per capita in Ivory Coast was last recorded at 548.69 US dollars in 2011. The GDP per Capita in Ivory Coast is equivalent to 4 percent of the world's average. GDP per capita in Ivory Coast is reported by the World Bank. Ivory Coast GDP per capita averaged 719.47 USD from 1960 until 2011, reaching an all time high of 1091.19 USD in December of 1978 and a record low of 548.69 USD in December of 2011. The GDP per capita is obtained by dividing the country's gross domestic product, adjusted by inflation, by the total population.

⁵ - <http://www.tradingeconomics.com/ivory-coast/indicators>

⁶ - GDP Annual Growth Rate | Notes

The annual growth rate in Gross Domestic Product measures the increase in value of the goods and services produced by an economy over the period of a year. Therefore, unlike the commonly used quarterly GDP growth rate the annual GDP growth rate takes into account a full year of economic activity, thus avoiding the need to make any type of seasonal adjustment.

⁷ - GDP per capita | Notes

The GDP per capita given on this page shows the GDP at purchaser's prices in constant 2000 U.S. dollars divided by midyear population. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Dollar figures for GDP are converted from domestic currencies using 2000 official exchange rates. The term Constant Prices refers to a metric for valuing the price of something over time, without that metric changing due to inflation or deflation.

Government Budget⁸

Ivory Coast recorded a Government Budget deficit equal to 2.50 percent of the country's Gross Domestic Product in 2011. Government Budget in Ivory Coast is reported by the Central Bank of West African States. From 2002 until 2011, Ivory Coast Government Budget averaged -1.4 Percent of GDP reaching an all time high of -0.4 Percent of GDP in December of 2006 and a record low of -2.5 Percent of GDP in December of 2011. Government Budget is an itemized accounting of the payments received by government (taxes and other fees) and the payments made by government (purchases and transfer payments). A budget deficit occurs when an government spends more money than it takes in. The opposite of a budget deficit is a budget surplus

Balance of Trade⁹

Ivory Coast recorded a trade surplus of 1977.74 billion CFA Franc in 2010. Balance of Trade in Ivory Coast is reported by the Central Bank of West African States. From 1977 until 2010, Ivory Coast Balance of Trade averaged 752.3 billion CFA Franc reaching an all time high of 2029.4 billion CFA Franc in December of 1998 and a record low of -1058.1 billion CFA Franc in December of 2000. Cote d'Ivoire's trade surplus is result of exports of cocoa and its oil. However, Cote d'Ivoire is a net importer of processed oil products and capital equipment. The main trading partner is France (14 percent of imports and 12 percent of exports) followed by Nigeria, Netherlands and United States.

Exports and Imports¹⁰

Exports in Ivory Coast decreased to 5112.58 billion CFA Franc in 2010 from 5348.42 billion CFA Franc in 2009. Exports in Ivory Coast is reported by the Central Bank of West African States. From 1977 until 2010, Ivory Coast Exports averaged 2172.1 billion CFA Franc reaching an all time high of 5435.1 billion CFA Franc in December of 1998 and a record low of 579.1 billion CFA Franc in December of 1979. Cote d'Ivoire is the world's largest producer of cocoa (30 percent of global production). The country also exports significant amount of crude oil (30 percent of total exports). Others include: coffee, palm oil, timber, cotton, fish and gold. Cote d'Ivoire's main export partners are France (12 percent of total exports) and Netherlands (11 percent). Others include: Nigeria, United States, India and Germany.
